

## EMAKHAZENI LOCAL MUNICIPALITY

### BETTER LIFE FOR FARM DWELLERS

Above: The Hon. Executive Mayor, Cllr. T.D. Ngwenya inspecting the newly conceptualized water supply in rural areas project.

The current council, with the guidance of the Hon. Executive Mayor, resolved to ensure sustainable water supply for the rural communities. This was done through the identification of the areas with high water yield and 40 Kiloliters tank installed with reticulation network for the local communities. The tank is also equipped with the water extraction for the water tankers to supply the surrounding communities.

The project is intended as a precursor to the water-borne sanitation project for the rural areas.
